Heartbeat® supports

**MTSS**

## Scale support for all of your MTSS tiers

MTSS is a great structure to support students holistically. The struggle is scaling support down to tier 1 students. The most effective way to reduce tier 2 & tier 3 problems is to make your MTSS program proactive rather than reactive.

Heartbeat gives immediate, personalized feedback to those students, not relying on a tops down model to help them.

# How Heartbeat solves and supports MTSS

## Tier 3

Students aren't supported in the majority of MTSS programs because it would take too many resources. Heartbeat adds cognitive power to your school/district scaling a personalized approach to all students.

## Tier 2

Heartbeat allows administrators, teachers, and counselors/MTSS specialists to create groups to highlight tier 2 student needs from a campus-wide view, but also down to individual student needs. This allows an individual to have impactful conversations with each student during a short meeting/hallway interaction or even provide guidance to the entire faculty based on trends that are seen in Tier 2 students.

## Tier 1

Counselors/MTSS Specialists create groups for Tier 3 students and take ownership of following trends to support their current efforts to assist Tier 3 or high risk students. Note: Heartbeat is not designed to be a Tier 3/High risk program.

# How Heartbeat is implemented in your school

Heartbeat is implemented in a specific period for 5-10 minutes, 2-3 times per week so every student has the time and space to learn about their own superpowers and challenges, as well as educational preferences.

## Tier 3

Students engage during Homeroom/Advisory Period.  
Students drive agency through usage.

## Tier 2

Counselors and Teachers target and create new group for  
Tier 2 students based on peaks, per grade level.

Counselors and Teachers then use Pulse metrics for  
implementing small group teaching strategies.

## Tier 1

Counselors and Teachers target and create new groups  
for Tier 3 students based on peaks, per grade level.

Counselors meet weekly to document strategies and  
provide helpful tips to teachers on how to use the Pulse  
metrics to drive 1:1 conversations.
